Requirement

Application requires two file to run successfully:

- 1) MobileClient.jad
- 2) MobileClient.jar

After successful download, click on "**MobileClient.jad**" file which will start installing the application on the mobile phone. After successful completion, an Icon of **Mobile Client** application appears on the screen

How to use:

When user clicks on "**Mobile Client**" icon, user gets Login screen like this:

The screenshot shows the 'User Login' screen. It features a blue header with the Routemobile logo and the text 'User Login'. Below the header, there are two input fields: 'Username' and 'Password'. The 'Remember me' checkbox is unchecked. At the bottom, there are two buttons: 'Login' and 'Exit'.

Login:

On this screen user can enter his **username** and **password** and click "Login" button. On clicking "Login" button, application authenticates user. If authentication fails, a dialog popup generates, for "Login Failed. Please trv again later".

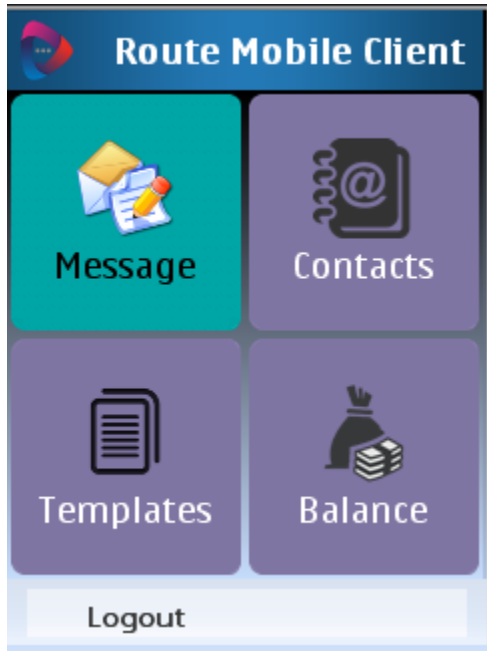

The screenshot shows the 'User Login' screen with the 'Username' field filled with 'bulksms' and the 'Password' field filled with '*****'. The 'Remember me' checkbox is checked. The 'Login' and 'Exit' buttons are visible at the bottom.

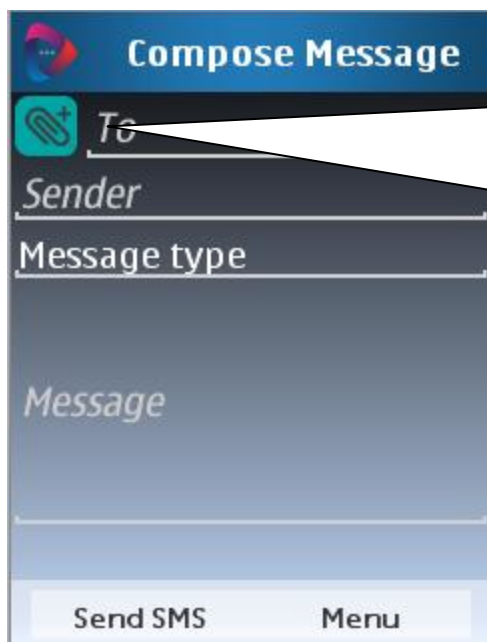

Remember me (Checkbox):

If you click this checkbox then login credentials get stored and next time when you will open the application you will be directly redirected Compose Message Form. (No need to

After successful login, "RML Mobile Client" form is displayed. Here user gets option to "Compose Message", "Manage Contacts", "Manage Templates" and "Check Balance".

On clicking "Message", "Compose Message" form will be displayed, where user can compose message and enter / select destinations.

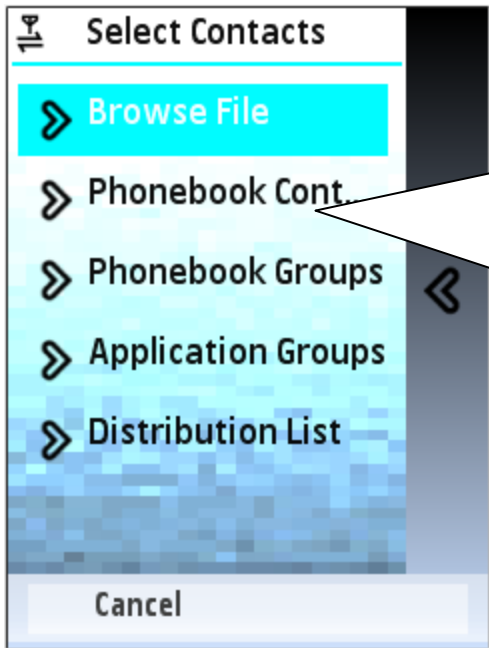

Attach Button:

Logout:

You can remove your stored credentials using this option. When user opts this option, user gets following screen displaying dialog box asking "Do you want to remove User Credentials?".

If user clicks Yes, then user's stored credentials get removed and he is redirected to Login page.

Important Notes:

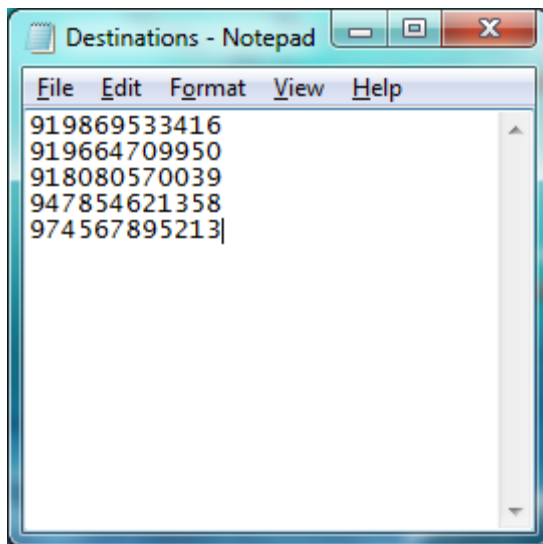

For successful delivery of message, please follow below mentioned points:

1. Destination:

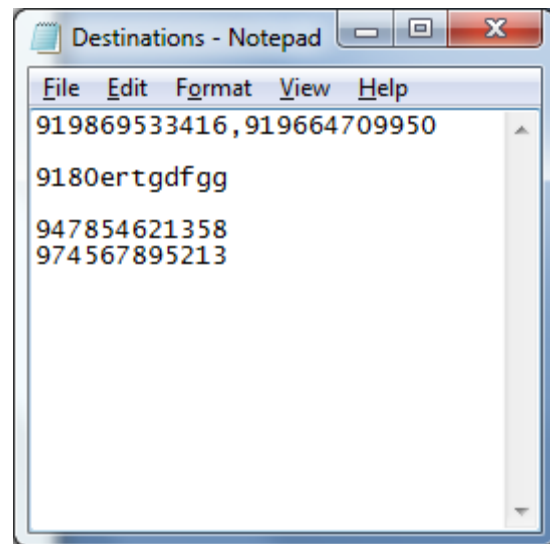

- i. Destination must be valid.
- ii. Destination must contain country code. example 919856854717.
- iii. Destination may contain (+) sign. example +919856854717.(optional)

2. Text File:

- i. Text file must contain each destination number in new line.
- ii. File will never contain characters/spaces/etc within destination.
- iii. File never contains blank line between two destinations.

Correct File

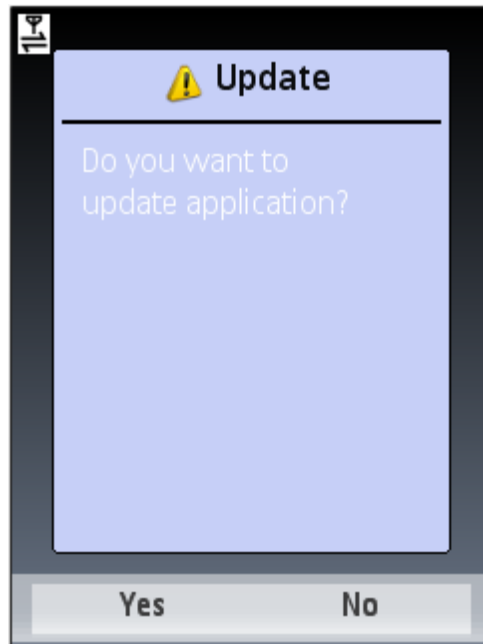

Wrong File

3. Phone Book contacts: Contact number always contains country code.

Auto updates:

Application automatically checks updates from server, if any updates found, then it asks for update, like this:

If you select "Yes", then it starts downloading updated version of application.
